RVH President & CEO

Our Promise to the People of this Region

Generations of Simcoe Muskoka families have counted on Royal Victoria Regional Health Centre (RVH) to deliver the best and most compassionate healthcare possible. Their trust is not something we take lightly. In fact, it's what drives us to continually raise the bar on the excellent care we provide. It's why we create innovative programs, develop strategic partnerships, and procure state-of-the-art equipment. It's our reason for being.

But our community is changing. It's growing dramatically – at twice the provincial average – and drawing people with diverse needs and backgrounds. And healthcare is changing too. Digital technology and the growth of Artificial Intelligence (AI) are dramatically shifting how and where we treat patients.

This past year we set out to forge a new framework to guide us into the future. We engaged thousands of patients, volunteers, health partners, donors, community leaders and Team RVH, and their input shaped our Strategic Plan for 2024 -2034 – Vivally You.

This ten-year roadmap will not only ensure the continuation of our long legacy of caring for this community, but also its growth. It will inform our Capital Expansion Plan, which includes the redevelopment of the Barrie Campus and building a new Innisfil Campus; direct our transition to an academic health sciences centre where teaching and research lead to better patient care; and pave the way for seamless access to advanced and specialized care close to home.

Most importantly, it will reinforce our purpose – **Making life better, with the care you need, close to home.**

The future is here, and RVH is ready for it.

Visit RVH's website (rvh.on.ca) to watch Vitalsigns – our annual video report to the region.

Achievement Highlights

Opened
PET / CT Scanner

Received
Landmark \$10-Million Donation

Replaced
